# Thank you for purchasing Aputure® Barn door.

The Aputure Barn Doors are an attachments designed for the Aputure LS 120D/120T/300D. They facilitate shaping of the light's beam, and prevents scatter of unwanted light leak with its four leaves. Aputure barn door also include a gel holder.

## Application Scenarios

1. Pair with Adapter ring

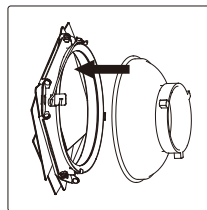

2. Pair with Fresnel mount

⚠️ **Caution Hot surface**

Warning: Don't turn on the light when four leaves are folded.

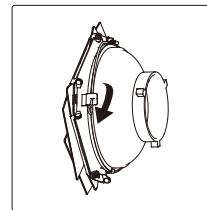

Installation

1. Place adapter(Fresnel/Reflector) to the back of barn door body

2. Lock it with rod

## Gel Installation

1. Insert Gel to Gel holder

2. Cut the extension of two edges

3. Insert Gel holder to barn door body
